DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trinh et al, US 2003/0035748 A1 (Trinh).

Trinh teaches a composition for treating textiles comprising a cyclodextrin and polycarboxylic acid and further comprising a catalyst and insect repellent, wherein said composition is applied to cellulosic fibers and textiles as required by claims 7-10 and 18-20. The composition can be applied to the textile, heated, subjected to moisture and dried as required by claims 4-6 and 11-17. See pages 25 and 26. It would have been obvious to the skilled artisan at the time the invention was made to form a fiber essentially as claimed motivated by the teachings of Trinh. Furthermore, it would have been obvious in view of the teachings of Trinh to treat a fiber using a process of the type contemplated by applicants comprising the method steps essentially as claimed.

No claims are allowed.
